

## Creating a New Installation Copy

Keywords  
New CD  
USB, Flash drive  
New installation  
No internet access  
Update

Applies to: *Auction! V3* and *V2*

**Background:** You may wish to create your own installation CD with the latest release or update a computer that does not have internet access.

### Step by Step in Auction! V3 or V2

1. From a computer that *does* have internet access, download the latest release of *Auction!* from our website  
[http://www.auctionsystems.com/CustomerArea/V3\\_Customer\\_Downloads.htm](http://www.auctionsystems.com/CustomerArea/V3_Customer_Downloads.htm)
  - a. If you will be burning a CD, you will follow the prompts to save the file to your desktop.
  - b. If you will be using a USB memory device, change the location to which the downloaded file will be saved to the drive letter associated with your USB memory device.
2. *For a CD:* Copy this folder (including subfolders) to your CD writing menu and burn the CD.  
*For a USB memory device:* Safely remove the USB memory device using the commands located on your task bar.
3. On the destination computer:
  - a. Uninstall any old versions of Auction!. *(If you have projects saved on your computer, you will not lose your data. Data is stored separately from the program itself and they will be available to you again when you reinstall.)*
  - b. Insert your new CD into the appropriate drive or your USB memory device into a USB port.
  - c. Open the CD or USB in My Computer or Windows Explorer.
  - d. Double-click the V3\_Install... icon and choose RUN.
  - e. Follow the prompts to complete installation.

\*\* If *Auction!* is already installed on a computer without internet access, see the related topic page [Updating Auction! On a Computer With No Internet Access.](#)
